

**IN THE CLAIMS:**

Please cancel claims 2-5 without prejudice to or disclaimer of the subject matter recited therein.

Please amend claims 1 and 6 and add new claims 10-14 as follows:

**LISTING OF CURRENT CLAIMS**

5 Claim 1. (Currently Amended) A PC CardBus structure arranged on a PC CardBus, wherein ~~an a~~ body of the PC CardBus has a connection port on one side thereof to connect to an electronic device and has an outer body on the other side, the outer body ~~comprising~~ comprising at least one plug-in port for receiving at least one peripheral, wherein ~~the improvement is that a power port is, unlike in the prior art being arranged on the same side with the plug-in ports, is~~ a power port is arranged on a bump at the outer body of the PC CardBus so that the power cord will not interfere with the connection cables of other peripherals when plugging in. in, wherein an interface of the plug-in port is a serial ATA interface.

Claims 2-5. (Canceled)

Claim 6. (Currently Amended) The PC CardBus structure of claim 1, wherein the bump of the outer body has an extending trench ~~capable of~~ for providing guidance of the power cord terminal while plugging in.

Claim 7. (Original) The PC CardBus structure of claim 1, wherein the electronic device is a notebook computer.

Claim 8. (Original) The PC CardBus structure of claim 1, wherein the electronic device is a tablet PC.

Claim 9. (Original) The PC CardBus structure of claim 1, wherein the electronic device is a PC.

Claim 10. (New) A PC CardBus structure arranged on a PC CardBus, wherein a body of the PC CardBus has a connection port on one side thereof to connect to an electronic device and has an outer body on the other side, the outer body comprising: an end with at least one plug-in port for receiving at least one peripheral; and a power port located on a bump at the outer body of the PC CardBus, the power port being disposed inwardly from opposite lateral sides of the outer body so that the power cord will not interfere with connection cables of other peripherals when plugging in.

Claim 11. (New) The PC CardBus structure of claim 10, wherein the bump of the outer body has an extending trench for providing guidance of the power cord terminal while plugging in.

Claim 12. (New) The PC CardBus structure of claim 10, wherein the electronic device is a notebook computer.

Claim 13. (New) The PC CardBus structure of claim 10, wherein the electronic device is a tablet PC.

Claim 14. (New) The PC CardBus structure of claim 10, wherein the electronic device is a PC.
